

ORIGAMI BUTTERFLY

In just a few steps, you will learn how to fold your own beautiful butterfly.

1. Start with a square piece of origami paper. Face the lighter side upwards.

2. Fold the paper in half by folding the upper left corner to the lower right corner.

Unfold. You now have a diagonal crease.

3. Fold in half again by folding the upper right corner to the lower left. Unfold.

4. Fold in half again by folding the top half back. Unfold.

5. Bring the left and right creases together into the centre.

6. Form this triangle.

7. Fold the left and right corner of the top layer to the top corner of the triangle. Turn the model over.

9. Fold the bottom part of the triangle up with a portion of the top corner showing, like in the picture. Turn the model over.

10. Pull down the left flap of the triangle and the side will be forced to bend in. Fold and flatten the side down.

11. Like before, pull down the right flap and fold in the side.

12. Turn the model over. Fold down the top triangle.

13. Fold a portion of the triangle back up, but leave some parts folded down. Slightly push the flaps together.
